

SAPIENCE

ENGINEERING & INFRASTRUCTURE

CORPORATE PROFILE

Integrated engineering for essential infrastructure

Our mission

SAPIENCE Engineering & Infrastructure (SEI) supports public, private and industrial organisations in the study, design, delivery, modernisation and maintenance of reliable, sustainable infrastructure.

Our expertise

01 Construction & civil works

Buildings, reinforced-concrete structures, utilities, earthworks, foundations and industrial platforms.

02 Energy & electrical engineering

Electrical plants and units, transformation, transmission, distribution, hybrid solar and backup power systems.

03 Industrial automation

Instrumentation, PLCs, control systems, SCADA, testing, commissioning and maintenance.

04 Mining

Mining electrical networks, process instrumentation, supervision and installation security.

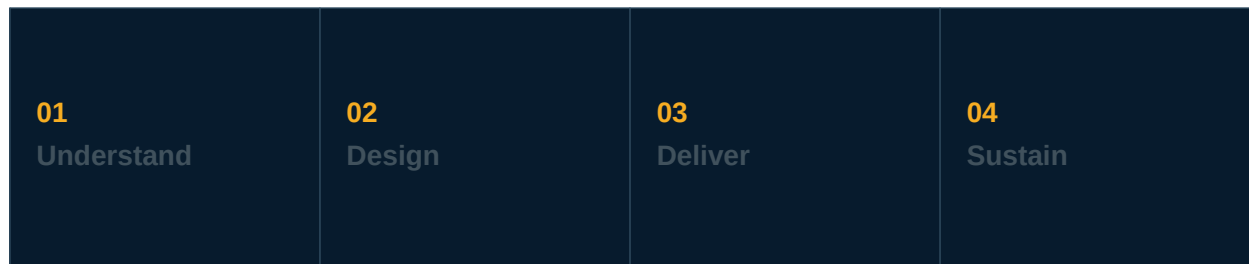

05 Oil & gas

Industrial electrical systems, gas and fire detection, automation, SCADA and functional safety.

06 Associated services

Feasibility, audits, basic and detailed engineering, owner's engineering, supervision, quality control and training.

A controlled delivery method

Commitments

Technical rigour, risk control, quality, safety, performance and durability guide every assignment. SEI promotes clear governance, traceable documentation and close cooperation with stakeholders.
